## 3R Search Delivers

Candidates that work with 3R Search understand the concept of technology + recruiting = results. They are routinely contacted by R.I.T.A. (our Recruiting, Interviewing and Telephony Application) during the early rounds of a search assignment and then end up working closely with one of our top recruiters during the later phases.

This approach allows us the maximum time to work with our clients. This means a better understanding of a particular search assignment, presentation of more qualified candidates and longer lasting relationships between clients and candidates.

### IT & Programming

### Oil & Gas

### Retail Development
